

Product Safety Recall

Do you own this product?

Australian Underwater Products — Oceanic QLR4 Weight Pocket

The QLR4 contains a weight pocket that is used within a scuba diver's buoyancy compensating device (BCD) to carry weight.

Affected BCD models:

Oceanpro Excursion Hera

Affected BCD serial number ranges:

- 608262-695909 • 1170357-1180342
- 1200001-1200070 • 20031001-22082698

The serial number can be found on the product warning label located on the BCD's cummerbund.

Affected weight pockets can also be identified by them not containing a date code on the underside of the handle.

Dates sold: 1 July 2019 – 1 June 2023

Why the product is recalled: The weight pocket handle may break, and result in the pocket becoming stuck in the BCD sleeve.

Hazard: There is a risk of drowning and death if the weight pocket cannot be removed from the BCD sleeve to allow the diver to re-surface safely.

1. Consumers should immediately stop using the weight pocket and check if the weight pocket is affected by using the BCD serial number tool on the Submerged Nation [webpage](#).
2. Affected consumers should submit a replacement QLR4 product claim form through the [webpage](#).
